
EXPERIENCE

JUNIOR MERN STACK DEVELOPER, Yale IT Skill hub | Coimbatore, TN

2026 – PRESENT

- Developed and maintained responsive, user-centric web applications utilizing the complete MERN stack (MongoDB, Express.js, React.js, Node.js), ensuring cross-browser compatibility and optimal performance.
- Designed and implemented secure RESTful APIs and integrated third-party services, enabling seamless data flow between the React front-end and Node.js back-end.
- Managed database architectures using MongoDB NoSQL, writing efficient queries and optimizing data schemas to improve data retrieval speeds and overall application scalability.

PROJECTS

PET ADOPTION, Sree Saraswathi Thyagaraja College | Pollachi, TN

2024– 2025

- Built a full-stack pet adoption platform using **MongoDB, Express.js, React.js, and Node.js (MERN)**, enabling shelters and adopters to connect digitally
- Implemented **JWT-based authentication** with protected middleware for secure user and admin access control
- Developed **RESTful API** with modular route architecture (Pet, Adoption, Admin, Auth) for scalable backend management

NOTEVERSE, Sree Saraswathi Thyagaraja College | Pollachi, TN

2025 – 2026

- Developed a full-stack AI-powered note management platform inspired by NotebookLM using the MERN stack.
- Integrated MongoDB for efficient storage and management of user notes and profile data.
- Added AI-powered features such as automatic note summarization and question-answering from notes.
- Used Git and GitHub for version control and project management.

EDUCATION

MASTER OF COMPUTER APPLICATIONS

Sree Saraswathi Thyagaraja College, JUNE 2026 | CGPA 7.5 (Up to 3rd Sem)

SKILLS

Languages: HTML, CSS, JavaScript

Frameworks: ReactJS, Express, NodeJS, jQuery, Tailwind CSS, Bootstrap, Motion.dev

Database: MongoDB, SQL, MYSQL, Supabase

API: REST, Postman, Gemini API Integration

Tools: GIT, GitHub, VS code, Antigravity (AI Editor)
